GREEN CAMPUS POLICY

Institution is committed to sustainability and environmental responsibility, hereby establishes this Green Campus Policy to guide and promote sustainable practices throughout our institution. This policy reflects our dedication to reducing our environmental footprint, conserving resources, and fostering a culture of sustainability among students, faculty, staff, and the wider community.

Objectives:

Environmental Conscious: Promoting responsible resource management and conservation, reducing waste, and minimizing our environmental impact.

Sustainability Education: Integrating sustainability principles into the curriculum and campus life to empower students to become environmentally responsible citizens.

Community Engagement: Collaborating with local communities and public to address environmental challenges and contribute positively to the region.

Resource Conservation: Implement energy-efficient technologies and practices to reduce energy consumption, promote water-saving measures and reduce water usage across campus facilities and establish waste reduction, encouraging responsible waste disposal methods.

Sustainable Transportation: Encourage the use of public transportation, cycling, walking, and carpooling among the campus community and to promote the use of electric and hybrid vehicles.

Student Engagement: Encourage student involvement in sustainability projects and clubs.

Organize and participate in sustainability-related events and outreach programs.

Tobacco free campus: usage of tobacco products and smoking is strictly restricted within college campus.

Rules and Guidelines for Plastic Usage and Waste Management

Reduce Single-Use Plastics: Avoid single-use plastic items like plastic bags, straws, cutlery, and disposable water bottles whenever possible.

Use Reusable Alternatives: Invest in reusable items such as cloth bags, stainless steel water bottles, and glass or stainless-steel food containers.

Avoid Microplastics: Minimize the use of personal care products that contain microplastics like microbeads.

Say No to Plastic Packaging: Choose products with minimal or no plastic packaging. Buy in bulk when possible and use your reusable containers.

opt for Eco-friendly Products: Look for products made from alternative materials like paper, glass, metal, or biodegradable plastics.

Reduce Plastic Wrap: Instead of plastic wrap, use reusable silicone food covers, wax wraps, or stainless-steel containers with lids to store food.

Dispose of Plastic Properly: Ensure plastic waste goes into proper trash or recycling bins and wet waste into other.

Join local clean-up initiatives to help remove plastic waste from public places, parks, and waterways.

Educate Yourself and Others: Stay informed about the environmental impact of plastic and share this knowledge with students and public to raise awareness. Find creative ways to repurpose plastic items instead of discarding them. For example, turn plastic containers into plant pots or storage containers.

Policy document for Energy Conservation

Institution aims to promote sustainability, reduce energy costs, and minimize the environmental impact of our institution's electricity consumption. Institution is committed to reduce carbon footprint and promote sustainability through responsible electricity usage. By adhering to this Electricity Usage Policy, Institution collectively contributes to a greener and more environmentally-friendly campus.

Objectives:

Facilities management department conducts regular audits to ensure the proper maintenance and operation of electrical systems to minimize energy wastage, enhance efficiency and ensure electrical systems meet safety standards and codes.

All members of the institute actively participate in energy conservation efforts like Turn off lights, computers, and other electrical appliances when not in use. Ensure that windows and doors are closed when heating or cooling systems are operating. Report any electrical issues or malfunctions to the facilities management department promptly.

All members of institute try to use natural light when possible and appropriate, incandescent bulbs are replaced with energy-efficient LED or CFL bulbs and turn off lights in unoccupied rooms and common areas.

Institution chooses energy-efficient appliances and equipment when purchasing new items, sign boards are placed in campus to unplug chargers, appliances, and equipment when not in use, set computers and monitors to energy-saving modes and turn off printers when not in use.

Policy document for Effective usage of Water and Conservation methods.

Institution is committed to protect and conserve valuable water resources. Through responsible water usage and active participation from the entire college community, Institution contributes to a more sustainable and environmentally friendly campus. Institute is commitment to reducing water consumption, minimizing wastage, and promoting water conservation throughout our campus. All members of the Institute are expected to adhere to this policy.

Objectives:

To minimize water wastage through efficient water management practices.

To raise awareness and educate all members of institute about the importance of water conservation.

To continuously monitor and improve water conservation efforts on campus.

Water Conservation Measures

- Institute install and maintain water-efficient fixtures, such as low-flow toilets, faucets, and showerheads, across campus to reduce water consumption.
- Regular inspections are conducted to detect and promptly repair any leaks in plumbing.
- The college will conduct awareness campaigns and educational programs to inform students, staff, and visitors about the importance of water conservation and provide tips for reducing water usage.
- Regular water usage data will be analyzed to track progress and identify areas for improvement.
- Faculties and Students are expected to use water responsibly and report any water leaks or wastage they observe on campus.
- Rainwater harvesting allows institute to collect and store rainwater for various purposes, reducing the dependency on municipal water supplies.
- Non-compliance with this policy may result in disciplinary action.
