

Outcome Based Education Policy

We are implementing an Outcome-Based Educational Policy that aligns with the National Education Policy (NEP) guidelines set forth by Bangalore University. This policy emphasizes a student-centric approach, promoting holistic learning, critical thinking, and problem-solving skills. We will encourage interdisciplinary education, leveraging information and communication technology (ICT) to enhance learning experiences and provide experiential opportunities through internships and industry projects. Continuous assessment methods will be employed to evaluate students' progress regularly, while faculty development programs will support educators in adapting to this outcome-based approach. By nurturing inquisitive minds and empowering our students, we aim to prepare them to become competent and responsible global citizens in the 21st-century landscape.
